eNATUREcloud

Waste Management

The simple solution for documentation, monitoring and management of operational waste streams.

eNATUREcloud integrates waste management, environmental reporting, energy reporting and CO2 tracking modules into one essential tool to define and monitor sustainability goals.

Module Waste Management

The application for master data-based documentation and monitoring of operational material flow management processes in waste-generating companies. eNATUREcloud (waste management) maps the standard processes for the disposal of hazardous and non-hazardous waste in companies or on construction sites – ideal for small and medium-sized enterprises.

- ▶ In-house waste disposal logistics - from disposal enquiry to warehouse management
- ▶ Disposal management – from disposition to collection
- ▶ Verification of invoices/credit notes
- ▶ Statistical evaluation and controlling (disposed quantities, costs and revenues)

MASK: TEMPLATE FOR AN ORDER

MASK: SUPPLIER CONTRACT

eNATUREcloud (WASTE MANAGEMENT) SUPPORTS THE MANAGEMENT AND MONITORING OF:

- ▶ Contracts (service agreements) with waste disposal service providers
- ▶ Waste disposal projects Waste
- ▶ disposal certificates
- ▶ Waste generation points
- ▶ Waste fractions
- ▶ Supplier certification e.g. eFB certificates
- ▶ Additional supporting evidence, e.g. in compliance with NachwV, GefAbfV, etc.
- ▶ Containers
- ▶ Cost centres

A WIDE RANGE OF EVALUATIONS ENSURE EFFICIENT CONTROLLING:

- ▶ Quantity of waste and recyclable materials disposed
- ▶ Disposal costs and revenues
- ▶ Certification and accountability requirements- for internal and external stakeholders (e.g. authorities)
